What do you need: *“I think a **passion for geography**, and an **interest in technology** are obviously important, and **an analytical mind** as well. Also an **interest in exploring data**, looking for patterns in data and the ability to do this in **different ways**.”*

Rob Sharpe - Training and education services manager
Esri UK

“GIS enables you to bring disparate datasets into one space, using geography as they key, allowing you to undercover patterns that ordinarily you wouldn’t identify.”
